

## **Science**

This half term we will be exploring living things and their habitats, recognising that living things can be grouped in a variety of ways. This will allow the children to understand and use classification keys and differentiate between vertebrates, invertebrates, mammals, amphibians, reptiles, birds and fish. Our focus on a scientist will involve research into Dian Fossey and her work with Mountain gorillas.

## **PSHE**

In PSHE the children will focus on what constitutes a healthy relationship, working with their peers to explore notions of difference, identity, getting along, resolving misunderstandings and differences of opinion and working together to achieve mutual and individual goals.

## **French**

Our topic of animals and pets will link to children work in Science

## **P.E**

The children will have P.E twice a week on Wednesday and Thursday, so could you please ensure that the children have their P.E kit at school on both days.

## **Art/DT**

In our creative lessons the children will use the batik technique to produce images of mountain ranges informed by our *Geography* topic.
